IV ORIENTEERING TROPHY REGION OF VALENCIA
WORLD RANKING EVENT
1st EVENT OF THE SPANISH ORIENTEERING LEAGUE
FEBRUARY 12, 13 & 14, 2010

Santa Pola Cape

The mountain of Santa Pola, also called Cap de l'Aljub is one of the capes that closes the bay of Alicante. An area of great environmental concern, threatened by urban pressures.

This natural environment stands out not only for its spectacular landscape, as demonstrated recently with its incorporation as representative logo of the locality, but also for its interesting vegetation and fauna.

EVENT

New Map

Map name: Cabo de Santa Pola

Base map: Joaquín Mayoral (Cartomaya, 2009).

Field review and paths: Santiago del Moral (Octubre de 2009).

Controller Judge: Francisco Gómez Covas.

Terrain

Low mediterranean forest, with large tracts of forest of reafforestation, where the race is easy in one direction. It has areas of badly eroded gullies and in some cases insurmountable, and a large quantity of stones scattered across much of the map.

To clarify the map reading and its readability in race, there are areas where we have omitted some stones.

Scales

By terrain features, both for Middle and Long distance, the map scale is 1/10.000. Both days and for all classes.

The children race *Correlín* will take place around the finish area and with 1/5.000 scale map.

Model Event scale 1/10.000 and in Caravasí map (located in the coastal side of Santa Pola Cape).

Regulations

Will apply the regulations in force of the IOF (WRE race) and the FEDO.

Timing systems

SPORTident for all classes, with ticket cards available in the promotion ones.
